

key word index

problems of cryobiology and cryomedicine, volume 31

3-hydroxy-4'- (N, N dimethylaminoflavone) 139

a

activation energy 14

activity

antibiofilm formation 127

contractile 258

Actovegin 116

age 23

agent (-s) cryoprotective 38, 70

alcohol intoxication chronic 151

alginate 343

antibiofilm formation activity 127

anti-inflammatory

action 364

drugs nonsteroidal 364

apoptosis 3, 268

autoimmune diseases 289

b

babesiosis 304

biofilm 127

biologically active complexes 127

blockade of renin-angiotensin-aldosterone system

drug 223

blood 191

blood cord 116

cells nucleated cryopreserved 151

serum cryopreserved 109

bone graft 89

brain 151

buds grape 51

c

calorimetry 51

canine erythrocytes 38, 304

cell (-s)

culture 82

immobilization 343

isolation 82

L929 316

Leydig 70

mononuclear 289

multipotent mesenchymal stem 58

stromal 268

skin- and muscle-derived fetal 249

thymic 249

nucleated cord blood cryopreserved 151

tolerogenic dendritic 289

characteristics morphological 326

chronic

alcohol intoxication 151

renal failure 223

cluster crystallization 203

coefficient (-s)

filtration 14, 316

permeability 14, 316

cold stress 3

combined surgical treatment 109

complexes biologically active 127

contractile activity 258

convoluted tubules 95

cord blood 116

cells nucleated cryopreserved 151

serum cryopreserved 109

corynebacterial 127

cranio cerebral hypothermia rhythmic 151

creatinine 223

cryoablation 116, 168

cryoextract 258

placental 223

cryo injury 236

two-factor theory of 214

cryopreservation 38, 51, 58, 70, 82, 161, 236, 249,

268, 304, 343, 316, 289

cryopreserved

cord blood serum 109

nucleated cells 151

placenta extract 364

placental biological product 353

cryoprotectants 14, 139, 203, 236 304

cryoprotective agent 38, 70

cryostimulation whole body 23

crystallization 236

cluster 203

intracellular 214

cultural properties 249

culture cell 82

d

dalargin 3

deformation thermoplastic 203

dendritic cells tolerogenic 289

dental pulp 58

derivatives oxyethylated 139

diagram state 203

diclofenac sodium 364

differentiation multipotent 58

diffuse hyperplasia 168

dimethylacetamide 139

dimethylsulfoxide 343 316

diseases autoimmune 289

dispersed systems 236

DNA fragmentation 3
dorsal root ganglia 258
drug blockade of renin-angiotensin-aldosterone system 223
drugs, *nonsteroidal anti-inflammatory* 364
dyscirculatory encephalopathy 151

e

effect solution 214
encephalopathy dyscirculatory 151
energy activation 14
enkephalins 3
erythrocytes 236
 canine 38, 304
Escherichia coli M-17 273
experimental hypothyroidism 353
explants 82
extract placenta cryopreserved 364

f

factors neurotrophic 258
fetal skin- and muscle-derived multipotent stromal cells 249
filtration coefficients 14, 316
fluorescence 139
follicles 326
fragility osmotic 38
fragmentation DNA 3

g

ganglia dorsal root 258
gel immobilization 273
germinal vesicle 161
gland thyroid 168, 353
glycerol 139
graft bone 89
granules lined 277
grape buds 51

h

hamsters 191
hibernation 191
hormones, *sex* 326
hydroxyethyl starch 70
hyperplasia diffuse 168
hypometabolism 191
hypothermia craniocerebral rhythmic 151
hypothermic storage 326
hypothyroidism experimental 353

i

immobilization cell 343
immobilization gel 273
immunophenotype 58
in vitro maturation 161
indices leukocyte integral 23
infiltration vacuum 51

integral leukocyte indices 23
intoxication alcohol chronic 151
intracellular crystallization 214
isolation cell 82

l

L929 cells 316
Lactobacillus rhamnosus GG 127
leukocyte(s) 23
 indices integral 23
Leydig cells 70
light microscopy polarized 236
lined granules 277
liquid nitrogen 89
liquid-liquid phase transitions 236
low temperature
 regimens of storage 127
 storage 273

m

mannitol-containing solution 326
maturation *in vitro* 161
mechanical stability 38
membrantropy 139
meristems 180
mice 82
microscopy light polarized 236
migration 268
mixtures 139
model physical-mathematical 14, 214
monocytes 289
mononuclear cells 289
morphological characteristics 326
morphology 223
multipotent differentiation 58
multipotent mesenchymal stem cells 58
multipotent stromal cells
 fetal skin- and muscle-derived 249
 mesenchymal 268
 thymic 249

n

neuropeptides 3
neurotrophic factors 258
nitrogen liquid 89
nonsteroidal anti-inflammatory drugs 364
normothermic storage 326
nucleated cord blood cells cryopreserved 151

o

oocyte 161
osmotic
 fragility 38
 reaction 180
osmotically inactive volume 316
osteoblast 89
osteoclast 89
osteocyte 89
oxyethylated derivatives 139

- p**
permeability coefficients 14, 316
phase transitions 51
 liquid-liquid 236
phenotype 268
physical-mathematical model 14, 214
PK-15 cells 14, 214
placenta 82
 extract cryopreserved 364
placental
 biological product cryopreserved 353
 cryoextract 223
plant vitrification solutions 180
polarized light microscopy 236
probiotics 273
product biological placental cryopreserved 353
proliferation 58
properties cultural 249
propylthiouracil 168
proteins 191
purulent wounds 109
- r**
rats 23, 82, 116, 168, 191
 spontaneously hypertensive 151
reaction osmotic 180
regimens of storage low temperature 127
renal failure chronic 223
renin-angiotensin-aldosterone system, *drug blockade of* 223
reproductive system 353
rhythmic craniocerebral hypothermia 151
- s**
Saccharomyces boulardii 127, 343
semen 277
sequins 277
serum cord blood cryopreserved 109
sex hormones 326
skin- and muscle-derived multipotent stromal cells fetal 249
sodium diclofenac 364
