## problems of cryobiology and cryomedicine, volume 32

1,2-propanediol 104

### a

ability fertilizing 34

actively proliferating cells 81

activity

*adhesive* 44

*biological* 63

*H<sup>+</sup>-ATPase* 58

*phagocytic* 44

*respiratory* 158

Actovegin 206

adhesion 256

adhesive activity 44

adjuvant arthritis 121

age 58, 196

aggregation, platelet 144

air cryotherapy extreme whole-body 226

animals domestic sperm 171

antioxidants 171

apoptosis 14

application medicinal leech 81

aqueous-saline extracts 144

arthritis adjuvant 121

### b

beetroot 183

biological activity 63

blood

*cord*

*cryopreserved* 196

*nucleated cells* 58

*leukoconcentrate human* 44, 121, 277

*low molecular weight fraction* 206

*pressure* 134

bone marrow 81

breakdown electrical 256

burns 144

### C

callus culture *in vitro* 214

cardiorhythmography 134

cardiovascular system 134

cell (-s) 158

*actively proliferating* 81

*nucleated cryopreserved cord blood* 58

cerium dioxide 267

chlorophylogenesis 214

circulating immune complexes 277

cold

*injury local* 24

*pressor test* 134

*storage* 68

*stress* 14

complexes immune circulating 277

conductivity electrical 256

conjugated fatty acids 267

cord blood

*cryopreserved* 196

*nucleated cells* 58

*leukoconcentrate human* 44, 121, 277

*low molecular weight fraction* 206

crop yield 183

cryoextract placental 121

cryofixation 3

cryopreservation 34, 44, 68, 92, 245, 277, 256

*sperm* 171

cryopreserved cord blood 196

*nucleated cells* 58

cryoprotectant 92

cryostimulation 196

cryotherapy, whole-body extreme air 226

crystal formation 3

culture callus *in vitro* 214

cytokines 121

cytoskeleton 92

### d

dalargin 14

desynchronosis 196

dimethyl sulfoxide 245

dioxide cerium 267

DNA fragmentation 171

dog erythrocytes 245

domestic animals sperm 171

### e

effect healing wound 144

eggs 68

electrical

*breakdown* 256

*conductivity* 256

electron microscopy 3

electroporation 256

embryo 256

endurance muscle 226

erythrocyte (-s) 3, 24, 92, 104, 267

*thermo-hemolysis* 144

*dog* 245

ethylene glycol 256

extracts aqueous-saline 144

extreme air cryotherapy whole-body 226

## f

fatty acids, conjugated 267  
fertilizing ability 34  
formation crystal 3  
fraction of cord blood low molecular weight 206  
fractions membrane 158  
fragmentation DNA 171  
freeze-drying 63  
freeze-substitution 3  
freezing 104, 183  
freezing-fracture 3

## g

genes VRN 214  
germination 111  
glycerol 104, 245  
goats male 34  
grain 111

## h

H<sup>+</sup>-ATPase activity 158  
healing effect wound 144  
hemogenesis 214  
hemolysis 267  
hormone  
    *thyroid-stimulating* 196  
    *thyroid* 196  
human  
    *cord blood leukoconcentrate* 44, 121, 277  
    *placenta* 144  
hydroxyethyl starch 245  
hyperlipidemia 206  
hypothermia 81  
hypothermic storage 245, 267  
hypotonic shock 24  
hypoxia 206

## i

immune  
    *complexes circulating* 277  
    *system* 44, 277  
*in vitro* callus culture 214  
index mitotic 81  
infarction myocardial 206  
injury cold local 24  
interferon- $\gamma$  44  
interleukin-10 44  
ischemic stroke 44, 277

## l

leech medicinal application 81  
leu-enkephalin 14  
leukoconcentrate human cord blood 44, 121, 277

leukocytes 14 58  
lipid peroxidation 267  
local cold injury 24  
longevity 111  
low molecular weight fraction of cord blood 206  
low temperature 111  
    *preservation* 144  
lyophilization 44, 121, 158, 277

## m

male goats 34  
marrow bone 81  
medicinal leech application 81  
membrane 3, 92  
    *fractions* 158  
microscopy electron 3  
mitotic index 81  
model 206  
moisture 111  
morphogenetic responses 214  
muscle  
    *endurance* 226  
    *strength* 226  
myocardial infarction 206

## n

nano particles 267  
necrosis 14  
nucleated cells cryopreserved cord blood 58

## o

osmotic  
    *resistance* 24  
    *stress* 104  
oxidative stress 171  
oxygen reactive species 92  
ozonation 183

## p

pain syndrome 226  
phagocytic activity 44  
placenta human 144  
placental cryoextract 121  
platelet aggregation 144  
polyethylene glycol 92  
polyethylene glycol 1500 245  
preservation low-temperature 144  
pressure blood 134  
properties sensitizing 63  
protein 92

## q

quality sowing 183

## r

rats 58

reactive

*oxygen species* 92

*term* 24

reactogenicity 63

rehabilitation 226

rehydration 158

resistance osmotic 24

respiratory activity 158

responses morphogenetic 214

rheovasography 134

rhizogenesis 214

rye winter 111

## s

sea urchin 68

seasonality 34

sensitizing properties 63

shock hypotonic 24

sowing quality 183

sperm

*cryopreservation* 171

*of domestic animals* 171

spermatozoa 34

starch hydroxyethyl 245

storage 111

*cold* 68

*hypothermic* 245, 267

strength muscle 226

stress

*cold* 14

*osmotic* 104

*oxidative* 171

stroke ischemic 44, 277

syndrome pain 226

system

*cardiovascular* 134

*immune* 44, 277

## t

temperature low 111

term reactive 24

test cold pressor 134

thermohemolysis erythrocyte 144

thermoregulation 226

thyroid hormones 196

thyroid-stimulating hormone 196

*Triticum aestivum* L. 214

tuberculin 63

## v

vernalization 214

vitrification 256

VRN genes 214

## w

whole-body extreme air cryotherapy 226

winter rye 111

wound healing effect 144

## y

yield crop 183
